EDUCATION

Vivekananda Kendhra Vidhyalaya - 2008 - 2022

B.Tech , Artificial Intelligence and data science - kcg college of Technology - 2022-2026

SKILLS

Progammig languages: JavaScript, Python, Solidit

Blockchain & Web3: Solidity, Smart Contracts, Hardhat, Ethers.js, Web3.js, The Graph, IPFS,

Software & Tools: VS Code, Android Studio, Remix IDE, Git, Docker, Postman,

Frameworks & Libraries: React.js, Next.js, Django, Node.js, FastAPI, Express.js, Tailwind CSS, GSAP, Framer Motion

Databases: MongoDB, MySQL, Firebase Firestore

AI & Machine Learning: Generative AI, AI Agents, LLM,

Experience

Mako IT Labs : Internship (2-months)

Generative AI Developer/Intern

Developed and fine-tuned **LLMs** for various NLP applications, optimizing performance for real-world use cases. Built AI-powered solutions using **LLaMA**, integrating them with web applications. Implemented **AI agents** capable of autonomous decision-making and task execution. Worked on **text summarization, chatbot development, and AI-driven content generation** using Python and FastAPI

PROJECTS

AI-Based Homework Helper Application

Developed an **AI-powered homework assistant** that helps students solve problems across multiple subjects using **LLMs**. GitHub - [Nihil2005/homework](#)

Workforce Management System

Built an **intelligent workforce management solution** leveraging **AI agents** for task allocation and scheduling. GitHub - [Nihil2005/Work_force_Management](#)

AID-DAPP

A decentralized application (DApp) designed to provide aid for individuals, leveraging blockchain technology for transparency and security. Github - <https://github.com/Nihil2k5/aid-dapp>

AI-Based Trip Planner

Designed and developed an **AI-powered trip planner** that generates personalized itineraries based on user preferences. GitHub - [Nihil2005/Ai-Trip-planner](#)

Web3-Based Employee Management System

Developed a **decentralized employee management system** using **Solidity, Hardhat, and Web3.js**. GitHub - [Nihil2005/web3-Employee-Management](#)
